

Privileged Access Management

Consulting Services

Why PAM matters

Privileged accounts are a top target for attackers. Without a strong PAM program, the risk of a breach goes up—and teams waste time fighting manual work and inconsistent processes instead of improving security.

Your environment needs ongoing monitoring, smart password/secret management, and steady capability upgrades to stay ahead.

Business outcomes

- Scale with confidence.
- Faster time to value.
- Lower operating effort.
- Continuous improvement.
- Around-the-clock readiness (optional).
- Deep expertise on tap.

What we deliver

- Vault & rotate privileged credentials (human, service, app-to-app).
- Just-in-Time elevation with approvals and time limits (least privilege).
- Session oversight with recording and risky command controls.
- Secrets management for apps, automation, and CI/CD.
- Integrations with AD/Entra, IGA, ITSM, SIEM/SOAR, SaaS/on-prem apps.
- Runbooks & evidence: clear processes, owners, and audit artifacts.

Who this is for

1. Companies with shared/admin accounts
2. Teams moving to JIT elevation
3. SOX/HIPAA/PCI scope

How we work

1. Assess & Plan (Quick Start)
2. Implement Core Controls
3. Integrate & Automate
4. Operationalize
5. Optimize (Quarterly)

Proof you can measure

- Privileged account coverage
- Rotation success rate
- JIT adoption
- Session exceptions reviewed
- Audit readiness

Measurable KPIs

- Privileged account coverage
- Rotation success %
- JIT adoption
- Session exceptions
- MTTR

Mini case study

Fintech (SOX, 400+ admin accts): 97% rotation success in 12 weeks; shared creds eliminated; emergency access ↓ 60%.
